\$ In theory student should appear for the CIE (Mid Semester Exam), submit the assignment and must secure 40% marks in SEE.

Elective I						
1. Functional Foods &Nutraceuticals : (FT 415.1)						
2. Beverages Technology		: (FT 415.2)				
3.Refrigeration Engineering	:	(FT 415.3)				
4.Database Management	:	(FT 415.4)				

Note: Tutorials and Practical to be conducted in batches with batch strength not exceeding 15 students

CIE: Continuous Internal Evaluation SEE: Semester End Examination IPE: Internal Practical Evaluation EPE: External Practical Examination IOE: Internal Oral Evaluation EOE: External Oral Examination

MAJOR PROJECT (Phase I)

Teaching Scheme: P: 2hour/week

The students are required to carry out one of the following projects related to field of Food Technology.

- 1. Process based Project: Manufacture of product.
- 2. Equipment based Project: Detailed design and fabrication of the equipment for a given capacity.
- 3. Experiment based Project: Experimental investigation of basic or applied research problem.
- 4. Industrial Problems: Any problem or project directly related to existing plants for modification of process or equipment or regarding pollution control and energy conservation under the guidance of one or more faculty members. The activity will be undertaken at the beginning of the seventh semester in consultation with concerned guide and it must be completed in eighth semester.

The project work is to be carried out by a group of students (not more than five students in a group). The students will submit the report to the respective guide, present their work at the end of Semester. They need to cover the following aspects related to their project topic:

- Introduction to the Project topic
- Detailed Literature Survey on the topic.
- Plan/outline of the Project work.
- Submitting requirements for execution the project work.

Based on the first phase work, it is desirable that the project group will publish a review article in a reputed and relevant Journal. The project group has to deliver Project Progress presentation.

The project progress will be evaluated by a research and review committee of internal teachers.

The committee includes concerned guide, the Program Coordinator, and other faculty members at the Department. This particular activity is assigned 50 marks as an IOE.

The committee will evaluate the performance of the project group. The students will follow one specific format recommended by the Program Advisory Board for submission of their Project Report.

Internship II Credit: 1

Credits: 01

Internship II which is part of Semester VII evaluation will be the activity after the SEE of semester VI.

It is mandatory for all the students to undergo the same and report to the institute for the semester VII along with the completion certificate by the concerned organization. The students have to submit a hard as well as soft copy of the activity report to the institute

ELECTIVE-II (OPEN ELECTIVE)

Besides the departmental electives there is a concept of open elective listed under Teaching Scheme:

L: 3hours/week Credits:3

The interested students have to choose the open elective from any of the specialized program available on the campus. The students have to contact the concerned course teacher and attend the classes in the respective course which will be taught by the concerned teacher.

MAJOR PROJECT (PHASE II)

Teaching Scheme: P: 06hours/week Credits:3

In the second phase of the Project Work, all the project groups will carry out actual execution the work planned as stated as an outcome of the first phase in the seventh semester. They will submit the final project report in two hard bound copies along with soft copy to the guide. The guide will submit one copy to the Program office and the other copy will be owned by him/her. The report will be prepared in a standard format as provided by the Program Advisory Board.

Generally, the report will consist of Introduction, Review of Literature, Materials and Methods, Result & Discussion, Summary & Conclusion and References. There may be little variation in project report writing depending on the nature of the respective project problem under investigation.

The objective of the project is to make use of the knowledge gained by the students at various stages of the B.Tech Food Technology Program. This helps to judge the level of proficiency, originality and capacity for application of the knowledge attained by the students at the end of the studies.

This particular activity will be for 100 marks as an Internal Practical Evaluation (IPE). The same research and review committee will carry out the assessment of the project groups.

For External Practical Examination (EPE) carrying 50 marks, there will be external examiner to assess the project work. The research and review committee along with the external examiner will examine each of the project groups through VIVA VOCE and physical verification of the project models if any. The students group will demonstrate their work to all the examiners.

Equivalence of Final Year B.Tech (Food Technology) Semester VII and VIII

The above detailed syllabus is a revised version of the Final Year B.Tech (Food Technology) Program being conducted by Shivaji University at its Technology Department. This syllabus is to be implemented from June 2023, (Academic year 2022-23). Prime feature of this revision is the transformation of existing curriculum into the concept of Outcome Based Education as specified in NBA rules and regulations. The Equivalence for the subjects/courses of Food Technology at Final Year B Tech Semester VII and VIII pre-revised Program under the faculty of Engineering and Technology is as follows.

Final Year B.Tech (Food Technology) Semester VII

Sr.No	Final Year B.Tech (Food Technology) Semester VII Pre-revised syllabus	Final Year B.Tech (Food Technology) Semester VII Revised syllabus	Remark

Glossary

B. Tech.: Bachelor of Technology, an Under Graduate Degree awarded from the Shivaji

University, Kolhapur

Director: Director, Department of Technology, Shivaji University, Kolhapur

DC: Department Committee

DEC: Departmental Examination Coordinator

Semester: The academic year shall be divided into two regular semesters of approximately 20 weeks duration each. Typically the odd semester shall be from the first week of July to last week of November while the even semester shall be from the first week of January to the last week of May.

This shall include the period of academic delivery (14 to 15 weeks), Continuous Internal Evaluation (CIE) i.e. Mid Semester Examination and Assignments, Semester End Examination (SEE) assessment and declaration of results.

Course: Subject

Course Coordinator: Subject teacher

Course Credit: Weighted sum of the number of Lecture hours (L), Tutorial hours (T), and Practical hours (P) associated with the course.

Credits Earned: The sum of course credits for credit courses in which a student has passed.

Grade: Assessment of the student's performance in a course indicated by the letters, "AA", "AB", "BB", "BC", "CC", "CD", "DD", "FF", "XX", "ABSENT", "PP", "NP".

Grade Point: Number equivalent of the letter grades given by 10, 9, 8, 7, 6, 5, 4 corresponding to grades "AA", "AB", "BB", "BC", "CC", "CD", "DD" respectively. "FF" and "XX" carry zero grade points.

Instructor: Member of faculty who shall be assigned to teach a specific course.

Semester Grade Points: The sum of the products of credits and Grade Points for each course registered by a student in a semester.

SGPA: Semester Grade Point Average

CGPA: Cumulative Grade Point

Average ATKT: Allowed to Keep Terms.

Four year B. Tech. Course Academic Rules and Regulations

R.B.T. 1 Admission:

Candidates are admitted to this course according to norms and conditions prescribed as per AICTE, DTE, and Maharashtra.

R.B.T. 2 Award of Degree:

Following rules prevail for the award of degree:

- 1. B.Tech Degree shall be awarded to the student, who has registered and earned all the credits of prescribed courses under the general departmental requirements.
- 2. In addition to the credit requirement prescribed above for the Degree award, each student shall have to complete the requirements of Audit Course (AC) during the programmer. All the students shall receive certification as PP (for Passed), and NP (for not passed) in AC, in the Grade Card. While obtaining certification as PP is a mandatory requirement for the Degree award of a student, this shall not be taken into account for computing the final Cumulative Grade Point Average.
- **3.** A student has obtained CGPA \geq 4.5.
- **4.** A student has paid all the institute dues and satisfied all the requirements prescribed.
- 5. A student has no case of indiscipline pending against him/her.
- **6.** University authorities shall recommend the award of B. Tech. Degree to a student who is declared to be eligible and qualified for above norms.

R.B.T. 3 Attendance Rule:

All students must attend every lecture, tutorial and practical class. However, to account for late registration, sickness or other such contingencies, the attendance requirement will be a minimum of 75% of the classes actually held. A student with less than 75% attendance in a course during the semester, in lectures, tutorials and laboratories taken together (as applicable), will be awarded an 'XX' grade in that course irrespective of his/her performance in the tests.

The course coordinator will award 'XX' grade to the student who is deficient in attendance taking into account the consolidated attendance record for the whole semester. For the purpose of attendance calculation, every scheduled practical class will count as one unit irrespective of the number of contact hours.

Attendance record will be maintained based upon roll calls (or any equivalent operation) in every scheduled lecture, tutorial and practical class. The course coordinator will maintain and consolidate attendance record for the course (lectures, tutorials and laboratories together, as applicable).

R.B.T. 4 Academic Progress Rules (ATKT Rules)

- 1. A student shall be allowed to register for the courses of the next year's odd semester only if he/she has earned all the credits of the previous year and has not failed in more than three passing heads (SEE, EPE/EOE) shall be considered for deciding the eligibility for ATKT.
- 2. For the promotion to the Third Year, studentshould not fail in more than three passing heads (SEE, EPE/EOE) of Second Year and all credits of First Year must be earned.
- **3.** For the promotion to the Final Year, studentshould not fail in more than three passing heads (SEE, EPE/EOE) of Third Year and all credits of Second Year must be earned.
- **4.** A student who has obtained 'FF' grade in SEE of a regular semester and has obtained 'FF' grade in 2nd attempt of SEE shall be eligible to choose one of the two options below to clear his/her backlog:
 - i.Re-registration for the next regular semester course whenever that course is offered. ii.Application for Repeated Examination.
- **5.** A student who has detained in a regular semester and obtained 'XX' grade can Re-register for the next regular semester whenever it is offered.
- 6. The maximum duration for getting B. Tech. degree for students admitted in the first semester of U.G. program shall be 12 semesters (six academic years) while for lateral entry students admitted in the third semester shall be 10 semesters (five academic years) from their date of admission. The maximum duration of the program includes the period of withdrawal, absence and different kinds of leaves permissible to a student but excludes the period of rustication of a student from the Department. If a student is unable to gain all credits of first year in three years from the date of his/her admission, then he/she shall be declared as "Not Fit for Engineering" leading to discontinuation of his/her registration with the Department.
- 7. If a student is unable to gain all credits of first year in three years from the date of his/her admission, then he/she shall be declared as "Not Fit for Engineering" leading to discontinuation of his/her registration with the Department.
- **8.** Depending upon the academic progress of a student, Department may take a decision regarding continuation or discontinuation of his/her registration with the institute.

R.B.T. 5 Academic Flexibility

- **1.** Flexibility in deciding Structure and Contents of Curriculum with reasonable frequency for changes in the same.
- **2.** Continuous Assessment of Students performance with newly adopted Credit System based on Award of Grade.
- **3.** Credits are quite simply a means of attaching relative values to courses different components. They are a currency of learning, and in general regarded as a measure of the time typically required to achieve a given curricular outcome.
- 4. All subjects (year-wise) under each course/discipline are unitized

R.B.T. 6 Credit system:

Education at the Institute is organized around the semester-based credit system of study. The prominent features of the credit system are a process of continuous evaluation of a student's performance/progress and flexibility to allow a student to progress at an optimum pace suited to his/her ability or convenience, subject to fulfilling minimum requirements for continuation.

A student's performance/progress is measured by the number of credits that he/she has earned, i.e. completed satisfactorily. Based on the course credits and grades obtained by the student, grade point average is calculated. A minimum grade point average is required to be maintained for satisfactory progress and continuation in the program. Also a minimum number of earned credits and a minimum grade point average should be acquired in order to qualify for the degree. All programs are defined by the total credit requirement and a pattern of credit distribution over courses of different categories.

R.B.T. 7 Features of Credit System at Department of Technology, Shivaji University, Kolhapur:

Every subject is allotted credits based on its academic importance/weightage.

- 1. All subjects may not have same credits.
- 2. 25 Credits / Semester.
- **3.** Absolute Grading System with 7 Passing Grades viz. AA, AB, BB, BC, CC, CD, DD and FF for failure.
- **4.** Standardization of courses; each course is of 6 units.
- 5. Continuous Internal Evaluation (CIE) and Semester End Examination (SEE), both having (70:30) weightage in the student's performance in Course Work/Laboratory Work and other activities. A student's performance in a subject shall be judged by taking into account the results of CIE and SEE together. Students must score 40% marks in SEE irrespective of the CIE marks. (Note: The CIE shall be conducted as Mid Semester Exam and assignments throughout the semester on dates announced in advance by the department, and its results made known to the

students from time to time. However, the dates for the SEE shall be fixed at the University level.)

- **6.** Continuous Internal Evaluation consists of Mid Semester Examination of 20 marks and assignment of 10 marks handled by Department of Technology and setting of question papers should be done by course coordinator. Assignments may be of varied nature for each course based on the need of the course coordinator.
- 7. Semester-End Examination (SEE), to be conducted by the Department of Technology, Setting of question papers should be done by course coordinator and jointly with an external examiner; this shall include a written examination for theory courses and practical/design/drawing examination with built-in oral part for laboratory/ design/drawing courses.
- **8.** Request for Mid Semester Examination for the students representing in co-curricular, extracurricular activities or on medical grounds will be considered only. On receipt of application from the student the DC will take decision for the conduct of the Mid Semester Examination.
- 9. Care shall be taken to ensure that the total numbers of days for academic work are ≥180 per year.
- 10. Academic schedule prescribed shall be strictly adhered to all the Branches.

R.B.T. 8 Course credits assignment:

Each course, except a few special courses, has a certain number of credits assigned to it depending upon its lecture, tutorial and laboratory contact hours in a week. This weight-age is also indicative of the academic expectation that includes in-class contact and self-study outside of class hours.

Lectures and Tutorials: One lecture or tutorial hour per week per semester is assigned one credit.

Practical/Laboratory: One laboratory hour per week per semester is assigned half credit.

Example: Course: Concrete Technology: 4 credits (3-0-2)

The credits indicated for this course are computed as

follows: 3 hours/week lectures = 3 credits

0 hours/week tutorial = 0 credit

2 hours/week practical = $2 \times 0.5 = 1$ credit

Also, (3-0-2) 4 credit course = (3 h Lectures + 0 h Tutorial + 2 h Practical) per week

= 5 contact hours per week

R.B.T. 9 Detailed Evaluation Scheme:

1. Out of total 100% theory weightage, 30% weightage is allotted for Continuous Internal Evaluation (CIE). Appearing for CIE is must and student must submit the assignments to become eligible for Semester End Examination (SEE) of respective course.

CIE (30% weightage) includes:

- a. Mid Semester Exam of 20 Marks of one Hour
- b. Assignment of 10 Marks during entire semester
- 2. For the Semester End Examination (SEE), 100 marks paper will be set and finally it will be converted to 70 marks, in which student must secure 40% (28 Marks out of 70) as university examination pass head andmust appeared for CIE to become eligible for SEE of respective course.
- 3. Final theory marks (out of 100) will be the addition of CIE (30 Marks) and SEE (70Marks).
- 4. Final laboratory letter grade will be awarded (100%) will be the addition of CIE (50%) and SEE (50%).
- 5. Semester End Examination (SEE) for laboratory consists of External Practical Evaluation (EPE)/External Oral Examination (EOE). Continuous Internal Evaluation (CIE) for laboratory consists of Internal Practical Evaluation (IPE) / internal oral Evaluation (IOE).
- 6. There shall be no (SEE) for laboratory courses of First Year. The entire assessment of a student shall be based on CIE (IPE/IOE) 100% weightage and a minimum performance of 40% in CIE shall be required to get the passing grade. CIE of laboratory work consists of (IPE/IOE) shall be based on turn-by-turn supervision of the student's work and the quality of his/her work as prescribed through laboratory journals and his/her performance in oral or Practical/Oral examinations uniformly distributed throughout the semester. Student must submit and secure 40% marks in the IPE/IOE of the concerned course. Non submission of IPE/IOE will lead to term not grant (TNG).
- 7. The assessment of laboratory course from the 3rd semester onwards shall be carried out in two parts.
 - i. CIE of laboratory consists of IPE/IOE shall be based on turn-by-turn supervision of the student's work and the quality of his/her work as prescribed through laboratory journals and his/her performance in oral or Practical/Oral examinations uniformly distributed throughout the semester. Student must submit and secure 40% marks in the IPE/IOE of the concerned course. Non submission of IPE/IOE will lead to term not grant (TNG).

- ii. SEE of laboratory shall be based on performing an experiment followed by an oral examination or a written examination.
- iii. The relative weightage for CIE and SEE for assessment of laboratory courses shall be 50% and 50% respectively from second year onwards and a minimum performance of 40% in both CIE and SEE separately shall be required to get the passing grade.
- iv. SEE for laboratory course shall normally be held one week before the SEE for theory courses and shall be conducted by a panel of examiners consisting of external and internal examiner. This activity shall be coordinated by Department Examination Coordinator (DEC) in consultation with Coordinator of the respective department.
- 7. A student failed in SEE of a laboratory course in a regular semester shall be eligible to appear for examination conducted along with SEE of laboratory courses of the subsequent semester. Such examination shall be fairly comprehensive (generally of 3 hours similar to EPE/EOE i.e. External Practical/Oral Examinations) to properly judge his/her practical skill and theoretical knowledge for that laboratory course. He/She shall suffer a grade penalty as per Table 3.
- **8.** Assessment of Seminar, Mini-project, Major Project etc:
 - i. The Seminar/Project report must be submitted by the prescribed date usually two weeks before the end of academic session of the semester.
 - ii. It is desirable that the topics for seminar/project be assigned by the end of previous semester.
 - iii. The seminar report and the presentation of seminar shall be evaluated by panel of three departmental faculty members (decided by Branch Coordinator).
 - iv. The mini-project shall be evaluated jointly by a panel of three Internal Examiners.
 - v. The report on field training shall be evaluated by a panel of three Internal Examiners.
 - vi. The assessment of B. Tech major project work shall be carried out in two phases as shown below:

I-phase CIE (50% weightage) consists of

- a) Departmental Committee (Synopsis submission seminar)
- b) Project work assessment by Guide(Departmental Committee consists of following: Director- Chairman

Branch Coordinator from respective branch – member

Senior faculty from respective branch – member Guide/Course Coordinator- member)

I-phase SEE (50% weightage) consists of Progress Seminar and presentation evaluated by Panel of Internal Examiners.

II-phase CIE (50% weightage) consists of

- a) Project work assessment by Guide
- b) Report submission seminar evaluated by Departmental Committee

II-phase SEE (50% weightage) (Final orals and presentations) evaluated by Panel of External and Internal Examiners.

- **9.** *Semester End Examination duration will be 4 hrs.
- 10. In respect of CIE, and Laboratory work a target date shall be fixed for the completion of each sheet, job, Project, experiment or assignment and the same complete or incomplete shall be collected on the target date and assessed immediately at the respective departments by the concerned teachers and % marks (or grades) shall be submitted to the Co-coordinator. The Co-coordinator of the Department of Technology shall communicate this % of marks (or grades) to the University within a week after the end of each term.

R.B.T. 10 Earning credits:

At the end of every course, a letter grade is awarded in each course for which a student had registered. On obtaining a pass grade (≥40% minimum grade DD), the student accumulates the course credits as earned credits. A student's performance is measured by the number of credits that he/she has earned and by the weighted grade point average.

The credit system enables continuous evaluation of a student's performance, and allows the students to progress at an optimum pace suited to individual ability and convenience, subject to fulfilling minimum requirement for continuation.

R.B.T. 11 CGPA Improvement Policy for award of degree:

A student getting CGPA \leq 4.50 with grade 'DD' in any course or grade 'FF' in any course shall have the possibility to repeat one or more 'DD' graded courses along with the failed courses, /are being offered in a semester.

An opportunity shall be given to a student who has earned all the credits required by the respective program with CGPA greater than or equal to 4.00 but less than 4.50, to improve his/her grade by allowing him/her to appear for SEE of maximum two theory courses of seventh and eighth semester.

R.B.T. 12Evaluation System:

| Semester Grade Point Average (SGPA)

$$\frac{\sum (Course credits in passed courses \times Earned Credits)}{\sum (Course credits in registered courses)}$$

2. Cumulative Grade Point Average (CGPA)

$$\frac{\sum (Course credits in passed courses \times Earned Credits) of}{\sum (Course credits in registered courses)}$$

- i. Cumulative Grade Point Average (CGPA) will be calculated cumulatively for Sem. I to Sem. VIII for regular students.
- ii. Cumulative Grade Point Average (CGPA) will be calculated cumulatively for Sem. III to Sem. VIII for lateral entry students.
- 3. At the end of B. Tech Program, student will be placed in any one of the divisions as detailed below:

Ist Division with distinction : CGPA \geq 7.5 and

above Ist Division : CGPA \geq 6.0 and \leq 7.5

 $II^{nd}Division$: CGPA > 5.5 and < 6.0

New gradation suggested as follows.

Table 1

Grade Points	Equivalent Range
5.5	55%
6.0	60%
6.5	65%
7.0	70%
7.5	75%

Conversion of CGPA to percentage marks for CGPA \geq 4.5 can be obtained using equation.

Percentage marks = $(CGPA \times 10)$

An example of these calculations is given below:

Typical academic performance calculations - I semester

Table 2

Course no.	Course credits	Grade awarded	Earned credits	Grade points	Points secured
Col 1	Col 2	Col 3	Col 4	Col 5	Col 6
					(col4 *col5)
MALXXX	5	CC	5	6	30
CSLXXX	4	CD	4	5	20
PHLXXX	4	AA	4	10	40
PHPXXX	2	BB	2	8	16
MELXXX	4	FF	0	0	00
TTNXXX	2	AB	2	9	18
Total	21		17	38	124

- 1. Total Points earned for this semester = 124 Semester Grade Point Average (SGPA) = $\frac{124}{21}$ = 5.90
- **2.** Cumulative Grade Point Average (CGPA) =

Cumulative earned credits = 23 (past semesters) + 21 (this sem.) = 44

Cumulative Grade Point Average (CGPA) =
$$\frac{\Sigma(124 + 124)}{\Sigma(23 + 21)}$$
 = 5.63
Table 3

System of Evaluation

Grade	Grade	Marks obtaine	Marks obtained (%)					
Grade	Points	Regular Semester	Re- examination	Repeated Examination				
AA	10	90-100			Outstanding			
AB	09	80-89	90-100		Excellent			
BB	08	70-79	80-89	90-100	Very Good			
BC	07	60-69	70-79	80-89	Good			
CC	06	50-59	60-69	70-79	Fair			
CD	05	45-49	50-59	60-69	Average			
DD	04	40-44	40-49	40-59	Poor			
DD\$	04	Below 40	Below 40	Below 40	Poor (Subject to Application of			

					Ordinance 96)
FF	00	Below 40	Below 40	Below 40	Fail
XX	-	-			Detained
ABSENT		-			Absent
PP					Passed (Audit Course)
NP					Not Passed (Audit
					Course)

Note: An equivalent certificate of CGPA to percentage of marks will be provided to student on his/her demand after remitting prescribed fees by Shivaji University.

R.B.T. 13 Entry of Students from Regular Pattern to Credit Pattern

A student of Department of Technology, Shivaji University, Kolhapur admitted before academic year 2020-21, and such student shall clear back log subjects of regular pattern if any, by appearing for respective examination conducted by Department of Technology. Further they shall undergo additional academic requirements (bridge course) if required as suggested by Department committee, so as to have turning with credit pattern.

R.B.T. 14 Audit Courses:

Additional courses shall be included as audit courses from the third semester onwards. While the performance of the student in audited courses shall be included in the Grade Card. These grades are not contributed to SGPA or CGPA of the concerned student.

R.B.T. 15 Awards of Grades for Re-Examination:

- A student who has obtained grade 'FF' in regular semester shall be eligible to appear for reexamination conducted before the commencement of the next regular semester.
- In such cases Continuous Internal Evaluation performance of a student shall not be wiped out.
- A student shall apply for re-examination before the last date of such application and shall appear for re-examination.
- 70% weightage similar to SEE shall be given to re-examination.
- A student who is eligible for re-examination, but remains absent for reexamination shall be given grade 'Absent'.
- A student shall be awarded a grade between 'AB' to 'DD', or 'FF' or 'XX' as given in Table 3 depending upon the cumulative marks obtained by him/her in CIE and Re-examination of SEE.

Here student has to suffer a grade penalty by accepting one grade lower as compared with the regular grades.

R.B.T. 16 Showing Evaluated Semester End Examination Answer Paper, Re-Evaluation, and applying for revaluation:

The evaluated answer book will be shown to the student as per the timetable prepared by the exam cell of DOT after the declaration of result. The grievances regarding the incorrect total and assessment of the not assed questions will be done by the respective faculty on submission of grievance form. A student having doubt regarding the grade declared in a course can apply for the photocopy of the answer book by remitting the prescribed fee as specified; a student can also apply for rechecking of his/her SEE answer book as per Shivaji University norms. There is no provision for showing of evaluated answer book, photocopy and rechecking for revaluation of the reexamination.

R.B.T. 17 Change of Branch:

Students shall be eligible to apply for Change of Branch after completing the first two semesters. The change of branch shall be permitted strictly on merit basis subject to the rules and regulations prescribed by Directorate of Technical Education, Maharashtra State/Admission Regulatory authority, Maharashtra State time to time.

R.B.T. 18 Disciplines and Conduct:

- i. Every student shall be required to observe discipline and decorous behavior both inside and outside the campus and not to indulge in any activity, which shall tend to bring down the prestige of the Department.
- ii. Any act of indiscipline of a student reported to the Department, shall be referred as per Shivaji University norms.
- iii. If a student while studying in the institute is found indulging in anti-national activities contrary to the provisions of acts and laws enforced by Government he/she shall be liable to be expelled from the Department without any notice.
- iv. If a student is involved in any kind of ragging, the student shall be liable for strict action as per Maharashtra anti-ragging act 1999, which is in effect from 15th May 1999.
- v. If any statement/information supplied by the student in connection with his/her admission is found to be false/ incorrect at any time, his/ her admission shall be cancelled and he/she shall be expelled from the institute and fees paid shall be forfeited.
- vi. Student once admitted in the Department of Technology shall follow instructions issued from time to time.

- vii. If a student is found guilty of malpractice in examinations then he/she shall be punished as per the recommendations of the Shivaji University, Kolhapur.
- viii. Every admitted student shall be issued photo identification (ID) card which must be retained by the student while he/she is registered at Department of Technology. The student must have valid ID card with him/her while in the Department of Technology.
 - ix. Any student who alters or intentionally mutilates an ID card or who uses the ID card of another student or allows his/her ID card to be used by another student shall be subjected to disciplinary action.
 - x. The valid ID card must be presented for identification purpose as and when demanded by authorities. Any student refusing to provide an ID card shall be subjected to disciplinary action.

Note: All other rules and regulations will be applicable as per Shivaji University, Kolhapur.

Class, Part & Semester :			Final Year B. Tech. (Food Technology), Part IV, Semester VII					
Course Title		:	Meat, Poultry and Fish Processing Technology			Course Code:	:	FT 411
Teaching (Hours)	Scheme	:	Lecture:	e: 4 hr/week		Total Credits	:	04
Evaluation (Marks)	Scheme	:	CIE=30 (20+10)	SEE = 70	Grand Total=100	Duration of SEE	:	3 hr
Revision:		:	Fourth			Month	:	June 2023
Pre-requisites (if any)		:	In order to complete the course studies success a good knowledge of FT211, FT214, FT223, F		• /			
Course Domain		:	Core					

This course deals with the various sources of animal foods such as meat, fish and poultry, technology involved in their preservation and storage. The objective of this course is to make students aware of various processing technologies, handling and quality standards of meat, fish and poultry products.

	urse Objectives: The Course teacher will p to	Course Outcomes: Students will be able to			
1	Understand the current status of livestock as well as the nutritional profile of meat, poultry (egg and chicken) and fish etc.	1	Learn about the current situation of livestock and the nutritional profile of meat, poultry(egg and chicken) and fish etc.		
2	Learn muscle structure, chemical composition and physico-chemical properties of meat muscle	2	Describe the muscle structure, chemical composition and physico-chemical properties of meat muscle		
3	Gain knowledge of slaughtering and dressing techniques of animals and poultry	3	Apply slaughtering and dressing techniques of animals and poultry in the practical.		
4	Learn different methods of processing and preservation of meat	4	Comprehend different methods of processing and preserving meat.		
5	Learn processing methods used to preserve egg	5	Review the processing methods used to preserve egg		
6	Understand fish types and fish products	6	Learn about the fish types and fish products.		

Curriculum Content	Hours
Unit I	
Sources, Current Status of Meat, Fish, Poultry Processing Industries, Importance of Meat,	8
Poultry and Fish Processing in National Economy, QSR	
Unit II	
Muscle Structure, chemical composition and physico-chemical properties of meat muscle	8
Abattoir design and layout	
Unit III	8

Course Title	:		LEGUME AND OILSEED TECHNOLOGY			:	FT412
Teaching Scheme (Hours)	:	Lecture Tutorial	04 hr/Week 00 hr/Week		Total Credits	:	04
Evaluation Scheme (Marks)	:	CIE=30 (20+10)	SEE = 70	Grand Total =100	Duration of SEE	:	03 hr
Revision	:	Month .					June 2023
Pre-requisites (If any)	:	In order to complete the course successfully, it is important to have good knowledge of basic food science, nutrition and food processing.					
Course Domain	:	Program o	core				

Course Rationale: This course deals with knowledge and understanding of different legumes present worldwide, principles and its processing methods .Also it makes students to learn about different fermented products that can be prepared from different legumes.

Co	urse Objectives: The Course Teacher will	Ca	ourse Outcomes: Students will be able to				
1.	Explain to the students about legume present worldwide and their application in processing.	1.	Justify the role of basic food science, nutrition and knowledge of food processing for legume processing.				
2.	Describe about various unit operations and machinery required for legume processing.	2.	Choose legumes for effective utilization to develop various processed products.				
3.	Demonstrate the various legume based fermented products.	3.	Design the equipment required for legume processing.				
4.	Introduce students to the traditional and modern way of milling.	4.	Understand the methods of milling.				
5.	Illustrate students to the cooking quality of dhal and factors affecting cooking quality of dhal.	5.	Assess the processing scenario of legume based processed products.				
6.	Elaborate different oil extraction methods.	6.	Know the various quality aspects of legumes and its processed products.				
	Curriculum Content Hours						

Curriculum Content	nours
UNIT I Present Status and future prospects of legumes and oil Seeds	6
Major and minor legumes, oilseeds and pulses grown in world and their application,	
present Status and future prospects of Pulse milling industry in India and world	
UNIT II Morphology and classification of legumes, oilseeds and pulses	8
Morphology and Classification of legumes, oilseeds and pulses. Chemical	
composition and nutritional value. Antinutritional factors, their chemistry, methods	
of removal of antinutritional factors	
UNIT III Dehulling and Milling of oilseeds, legumes and pulses	10
Methods of dehulling Home, cottage and commercial scale. Modern techniques of	
dehulling. Milling of oilseeds, legumes and pulses: Dal milling principles, methods,	

equ	aipment and effect on quality. Principle products, fermented products of legumes.					
Soand and Tex	NIT IV Processing of oilseeds, legumes and pulses. aking principles, methods of soaking, sprouting, puffing, and roasting. Physical d bio-chemical changes during these processes atturized vegetable protein, hydrolyzed vegetable protein, formulation and ocessing, Types of processed products	10

Teaching Scheme (Hours)	:	Lecture: 04 hr/week Tutorial: hr/week		Total Credits	:	4		
Evaluation Scheme (Marks)	:	CIE=30 (20+10)	~ E		Duration of SEE	:	3 hr	
Revision:	:	Fourth	Fourth				June 2023	
Pre-requisites (if any)	:	The students should have basic knowledge of Food chemistry, Food processing and food microbiology.						
Course Domain	:	Core	Core					

Course Rationale: This course deals with knowledge and understanding of different principles, equipments and instruments involved during bio-processing. In addition students learn about different unit operations of upstream and downstream processing. Also student familiar with fermented products and their biochemical and microbial analysis.

Co	urse Objectives: The Course teacher will	Course Outcomes: Students will be able to				
1.	State conceptual knowledge of regulatory and social aspects of Biotechnology.	1.	Summarize basic concept of biotechnology and apply it in various fields.			
2.	Describe recombinant technology and molecular cloning.	2.	Gaining knowledge of biotechnology in food industry for development of different products.			
3.	Identify Genetically modified organism (GMO), crop, and foods (GMF).	3.	Demonstrate the importance of microbiology in strain development for industrially important microorganisms.			
4.	Analyze microbial cultures used in food industry.	4.	Reorganizes precise fermented food technology to prepare various healthy products.			
5.	Formulate upstream and downstream processes of various fermented food products.	5.	Explain upstream and downstream processing unit operations			
6.	Make use of new techniques for production of fermented foods.	6.	Evaluate biochemical and microbial parameters of food product.			

Curriculum Content	Hours
Unit I : Introduction to Food Biotechnology	8
History and development of biotechnology. Regulatory, ethical and social aspects of	
biotechnology of foods. and importance of biotechnology in food safety	
Unit II Strain Improvement of industrially important microorganisms	8
Methods of molecular cloning, immobilization of microbial and cultured plant cells. Plant	
and animal tissue culture. Microbial cultures for food fermentation, strain improvement	
techniques.	
Unit III Genetics and its application in food production	12
Application of genetics such as Genetically modified organism (GMO), transgenic animals,	

Department of Technology, B.Tech (Food Technology) Program- Syllabus w.e.f. 2023-24

Ge	netically modified crop such as Golden rice, herbicide resistant crops, and pesticide resistant	
cro	ps etc., Genetically modified foods (GMF) and related regulations by standard regulatory	
aut	horities.	
Un	it IV: Introduction to Biotechnological aspects industrial production	6
Bio	otechnological aspects of industrial production of alcohol(beer, wine), alcoholic beverages,	
ant	ibiotics, organic acids(vinegar, lactic acid), polysaccharides, amino acids, single cell protein,	
gly	cerol, enzymes and vitamins, and distilled alcoholic beverages such as whiskey, rum, vodka)	
Un	it V: Upstream and downstream processing.	10
	tabolic Engineering, scale up of fermentation, Extraction and recovery of product.	
	it VI: Fermented Food and their biochemical and microbial analysis	8
Tra	ditional fermented foods like idli, sauerkraut, dosa etc. Soy fermented foods and other foods	
	e yoghurt, cheese, miso, tempeh, soya sauce etc.

Course Rationale: Food Packaging is a professional course targeted to cater the food packaging industry needs trained food professionals. The main objective of this subject is to impart knowledge and skills related to designing packaging system in food products and developing skills in handling of packaging equipment in the students. This course explain the different types of packaging materials, its characteristics and wide application in food industry. This course

included many newer packaging techniques.

Co	urse Objectives: The Course Teacher will	Col	urse Outcomes: Students will be able to
1.	Explain the role of different packaging	1.	Justify the role of packaging materials
	materials		for food preservation
2.	Describe the properties of different packaging materials	2.	Choose suitable packaging materials for different food products
3.	Demonstrate different packaging materials for different food products	3.	Design food grade packaging materials
4.	Introduce different quality	4.	Understand the properties of different
	characteristics for different packaging materials		packaging materials
5.	Illustrate the designing of different packaging materials	5.	Assess quality characteristics for different packaging materials
6.	Elaborate newer food packaging technologies	6.	Know newer food packaging technologies

Curriculum Content	Hours
UNIT I Introduction to Food Packaging	08
Need for Packaging and Functions of packaging. Levels of packaging. Factors	
affecting quality of good materials- product environment and spoilage factors,	
labeling laws, Package Environment, Classification of packaging materials and its	
Application	

UNIT II Paper and Plastic Packaging	12				
Paper: Manufacturing method, types, characteristics and advantages.					
Plastic: Manufacturing method, types, characteristics and advantages. Lamination,					
need of lamination, types, properties, advantages and disadvantages of each type.					
Types of coatings. Need of coating, methods of coatings.					
UNIT III Glass and Metal Packaging	08				
Glass: Manufacturing method, types, characteristics and advantages.					
Metal: Manufacturing method, types, characteristics and advantages.					
UNIT IV Packaging of Specific Foods	08				
Packaging Machineries, Packaging of specific foods with its properties like bread,					
biscuits, coffee, milk powder, egg powder, carbonated beverages, Snack foods etc.					
Packages type i.e. FFS, Standable pouches					
UNIT V Food Packaging Techniques	08				
Food and Packaging material interactions including migration, scalping of flavor;					
Aseptic processing and packaging, Biodegradable packaging					
UNIT VI Novel Food Packaging	08				
CAP/MAP packaging, Irradiated packaging, Retort pouch, Microwaveable packaging					
packaging for high pressure processing, active packaging; smart/intelligent packaging	5

Beverage Technology will help students to develop their skills in the areas of beverage. The course will focus on making students understand the basics of beverages, get familiar with different types of beverages, the importance of beverages for Indian population. The course is completely Industry oriented which includes all the knowledge of processing and packaging technologies that is required in industries.

Col	urse Objectives: The Course teacher will	Cour	rse Outcomes: Students will be able to
1.	Support students in understanding the present status plus future prospects of beverages in India and Globally	1.	Describe the present status and future prospects of their importance.
2.	Guide the students on principles involved in the Beverage processing	2.	Understand the role of various ingredients used in beverages
3.	Help to get acquainted with equipment required for beverage manufacturing	3.	Know the working principle of various types of equipment required for beverage manufacturing
4.	Help the students to apply basic food science knowledge and get to know beverage technology	4.	Formulate the different alcoholic and Non-alcoholic beverages
5.	Inform students the role of various ingredients used in beverages	5.	Analyze various quality parameters for different beverages
6.	Help to understand quality and regulatory aspects of Beverages	6.	Select the suitable packaging materials for different types of beverages

Curriculum Content	Hours

This course is to provide students with an overview of the field of functional foods, nutraceuticals and natural health products. The course enables students to understand the functional food concept as related to ingredient efficacy and safety. In addition, it familiarizes students with: examples of bioactive ingredient-disease relationships and the importance of clinical study support; regulatory aspects of functional foods; and requirements for standards of evidence of efficacy for health claims; and market determinants of the functional food industry.

	determinates of the functional food industry.								
Со	urse Objectives: The Course teacher will	Cou	Course Outcomes: Students will be able to						
1.	Explain and introduce the all types of functional food, nutraceutical food, specialty foods and health foods, etc.	1.	Understand the concept of functional and nutraceutical foods.						
2.	Describe emphasis on to the principles of specific consumer oriented foods. Introduce students the requirement of specific consumer oriented foods.	2.	Design specific consumer oriented food						
3.	Illustrate the action of probiotic and prebiotic and also inform students about necessity of GM Foods, Proprietary foods and Supplementary foods	3.	Identify the purpose and functions of probiotics, prebiotics and supplementary foods for development of functional and nutraceutical foods.						
4.	Explain the principle and concepts of bioactive components extraction methods	4.	Explore the regulatory aspects for different functional and nutraceutical foods.						
5.	Demonstrate the beneficial effects of functional foods and nutraceuticals	5.	Understand and apply the role of different ingredients for development of functional and nutraceutical foods						
6.	Categorize food for the specific physiological disorders	6.	Know the various bioactive compounds and its application for physiological disorders						

	Curriculum Content	Hours
Un	it I : Introduction	8
Nu	ope, importance and renewed emphasis on specialty foods, health foods, functional foods, traceutical, infant and baby foods, adolescent/ teen age foods, foods for pregnant ladies and rsing mothers, geriatric foods, Concept of supplementation	
Un	it II : Specific consumer oriented foods	6
	fense persons, Space / astronought, High altitude mountain climbers, Disaster situation – ses, care, and maintenance.	
Un	it III : Transgenic plant foods with health claims	6
	ebiotics and Probiotics, Quality Assurance of Probiotics and Safety, Genetically modified ods, Proprietary foods, Supplementary foods.	
Un	it IV: Beneficial Effects Functional Foods and Nutraceuticals	6
	neficial Effects of Spices, gamma-linolenic acid, Spirulina, antioxidants and other food nstituents.	
Un	it V: Bioactive components	5
Sou	urces, extraction methods, uses and health benefits	
Un	it VI : Development of Functional Foods	8

Course Domain	:	Core					

The objective of the course is to provide an introduction to the principles of air conditioning and refrigeration. The course will provide a basic understanding of the types of air conditioning and refrigeration systems, applications and operating principles.

Course Objectives: The Course teacher will help to			Course Outcomes: Students will be able to			
1.	Understand fundamentals, need and importance of HVAC systems	1.	Explain the fundamentals, need and importance of HVAC systems			
Familiarize various applications of refrigeration, air conditioning and cryogenics			Apply knowledge for various applications of refrigeration, air conditioning and cryogenics			
Get acquainted with psychrometric terms, its application in HVAC, comfort conditions and Design of refrigeration and air conditioning system			Analyze psychrometric terms, its application in HVAC, comfort conditions and Design of refrigeration and air conditioning system			
4. Demonstrate the u se of psychrometry and calculate cooling load for air conditioning systems used for various applications			Solve problems of heat transfer in buildings and its application to heating and cooling load estimation			
5.	Understand psychometric properties	5.	Explain psychometric properties			
6.	Familiarize Refrigeration and air conditioning system.	6.	Analyze Refrigeration and air conditioning system.

Pre-requisites (If any)	:		Pre-requisites include basic knowledge of soft skills, presentation and familiarity of Food Technology field overview.						
Course Domain	:	Research S	Skills						

Course Rationale: Students' evaluation is by continuous internal examination and based on External Oral Evaluation at the end of the semester, based on attendance during the entire semester, project report submission at the end of semester.

Cou	Course Objectives: The Course Teacher will		Course Outcomes: Students will be able to				
1.	Plan for various activities of the project and distribute the work amongst team members;	1.	Apply fundamental and disciplinary concepts and methods to solve problems				
2.	Promote self-study, critical thinking and independent research ability;	2.	Identify, analyze, and solve problems				
3.	Make the students initiate their own small conceptual or practical based projects individually or as a team of no more than 4 members;	3.	Integrate information from multiple sources.				
4.	Make them use Research Methodology for the task undertaken;	4.	Analyze developed products				
5.	Trial exercise that may help them to satisfactorily complete their project	5.	Design, project manage and evaluate a concept/model/product				

Curriculum content

The students either individually or in a group of maximum 4 members will undertake a Major project on a particular topic under the guidance of an internal course teacher. Prior to the topic selection, the course in charge will guide them about searching topic related to requirements of industry, farmers and other societal issues. Student should submit their synopsis copy. The work progress will be monitored from time to time in batch wise review conducted during

the semester. During phase I student will complete half objectives of their proposed work. A report is to be written upon completion of the activity. The report should include academic contents such as the background, market survey, objectives, product/process description, the work done and conclusion. The Department will provide a specific format for report writing. The assessment of the major project work will be based on: 1. Attendance 2. Physical Demonstration of their work 3. Presentation based on the work carried out.

Class, Part & Semester	:	Final Year B. Tech (Food Technology), Part IV, Semester VII							
Course Title	:	I	Internship	II	Course Code	:	FT416

Evaluation Scheme (Marks)	:	IOE = Nil	EOE= 50	Grand Total = 50	Duration of EOE	:	NA		
Revision	:	Fourth	Fourth			:	June 2023		
Pre-requisites (If any)	:	The pre-requisite for this course is to have the idea of the overviewof the fundamental courses of Food Technology							
Course Domain	:	Core							

Course Rationale: The course helps students to develop their skills in the application of theory to practical knowledge. It helps to develop the skills and techniques which are directly relevant to their desired goals.

Cou	urse Objectives: The Course Teacher will	Co	urse Outcomes: Students will be able to
1.	Create a learning platform for the students where they can enhance their skills and prepare themselves for the future.	1.	Capable to acquire and apply fundamental principles of engineering.
2.	Enhance their skills-set in the area of their expertise and also convert their theoretical learning into practical experience.	2.	Ability to identify, formulate and model problems and find engineering solution in practical work environment
3.	Promote cooperation and to develop synergetic collaboration between industry and the university in promoting a knowledgeable society;	3.	Adapt good technical knowledge, management, leadership and entrepreneurship skills.
4.	Equip Student with qualities like integrity and leadership and build their self-confidence	4.	Write technical documents and give oral presentations related to the work completed
5.	Provide learners hands on practice within a real job situation.	5.	Develop attitude of a team player and aptitude for lifelong learning

Curriculum content

Students of Food Technology must undergo internship in reputed Private / Public Sector / Government organization related to food for minimum Four weeks after the Semester End Examination. Internal faculty members help and issue internship letter to students and place students at reputed industries/organizations for training program. A report is to be written upon completion of their internship. The report should include information about the industry, organization structure, different products, quality control and quality assurance department, waste disposal department and packaging and dispatch. The final assessment of internship will be based on 1. Industrial Report, 2. Presentation 3. Training certificate.

Class & Semester	:	Final Year B.Tech Food Technology, Part IV, Semester VII								
Course Title	:	Introduction to Indian Constitution	Course Code:	:	HS411					
Teaching Scheme (Hours)	:	Lectures= 2 hr /Week	Credits	:	Nil					
Evaluation Scheme (Marks)	:	Assignments : 50 Written Test : 25 Viva voce : 25 Grand Total : 100	Duration of Exam	:	Not Applicable					
Revision	:	Third	Month	:	June 2023					
Pre-requisites	:	It has no any pre-requisites. Every citizen of the country ought to study the course content.								
Course Domain	:	Audit Course at institute level, Humanities & Soc	ial Science							

Course Rationale: As a citizen of India, every student should have basic knowledge about Indian constitution. Every student should know the importance of Fundamental rights, Fundamental duties as well as Directive Principles. This course fulfills all these requirements. This course also includes knowledge about state as well as union legislature, judiciary and executive. It helps to understand emergency provisions, electoral process and amendment procedures. This course is helpful for the students to be legally updated.

Course Objectives: The Course Teacher will		Course Outcomes: Students will be able to				
1.	Familiarize students with the preamble	1.	Get associated with Indian Constitution			
2.	Describe fundamental rights & duties of citizens	2.	Understand their fundamental duties and rights.			
3.	Explain union and state executives.	3.	Recognize union and state executives.			
4.	Discuss constitutional provisions.	4.	Interpret about constitutional provisions.			
5.	Illustrate electoral process.	5.	Understand and follow the electoral process			
6.	Summarize role of democracy in social welfare.	6.	Realize importance of democracy in social welfare.			

Curriculum Content	
Unit I: Introduction to Preamble and Fundamental Rights	Hours
Preamble to the constitution of India. Fundamental rights under Part – III – details of Exercise	04
of rights, Limitations & Important cases.	
Unit II: Fundamental Duties and Directive Principles.	
Relevance of Directive principles of State Policy under Part – IV. Fundamental duties & their	05
significance.	
Unit III: Union Legislature, Judiciary & Executive.	04
President, Prime Minister, Parliament & the Supreme Court of India.	
Unit IV: State Legislature, Judiciary & Executive.	05
Governors, Chief Minister, State Legislator and High	
Courts. Unit V: Constitutional Provisions.	05
Provisions for Scheduled Castes & Tribes, Women & Children & Backward classes.	
Emergency Provisions.	
Unit VI: Electoral process & Amendment procedures: Constitution of election commission,	05
system of adult suffrage, procedure for amendment. 42nd, 44th, 74th, 76th, 86th and 91st	

Constitutional amendments.

Class, Part & Semester	:		Final Year B. Tech (Food Technology), Part IV, Semester VIII							
Course Title	:	Bi	ochemical I	Engineering	Course Code:	:	FT422			
Teaching Scheme	١.	Lecture:	04 hr/w	eek	Total	:	4			
(Hours)	•	Tutorial:	hr /week		Credits					
Evaluation Scheme (Marks)	:	CIE=30 (20+10)	SEE = 70	Grand Total=100	Duration of SEE	:	3 hr			
Revision:	:	Fourth			Month	:	June 2023			
Pre-requisites (if any)	:	The students should have basic knowledge of Food engineering I and II, Food microbiology, Food chemistry, physics and mathematics.								
Course Domain	:	Core								

Course Rationale: This course deals with knowledge and understanding of different principles, equipments and instruments involved during bio-processing. In addition students learn about different unit operations of product recovery and purification. Also student familiar with fermented products and their biochemical and microbial analysis.

Course Objectives: The Course teacher will Course Outcomes: Students will be able to			rse Outcomes: Students will be able to
1.	Studies of basic concept of Biochemical Engineering.	1.	Investigate applications of biochemical Engineering in various fields.
2.	Explain the mechanism and application of the bioreactor.	2.	Discusses importance of bioreactor in food industry for development of different products.
3.	Defines thoroughly the food processing unit operations.	3.	Enumerate product recovery and purification technique.
4.	Apply the principles of heat transfer and mass transfer phenomena	4.	Describes the microbial kinetics and Enzyme kinetics.
5.	States importance of the fermentation technology.	5.	Designs protocols for different fermentation product

Curriculum Content	Hours
Unit I: Kinetics of microbial growth and death	8
Definition, Types of kinetics, Batch and continuous type, control measures, fermentation	
kinetics of biomass production, product formation and effect of environment.	
Unit II: Enzyme kinetics	10
Simple kinetics model for enzyme substrate interaction. Derive the equation of Michelin Menton	
for reaction rate, product formation, and calculation of Km and Vmax values. Complex enzyme	
kinetics: Oxidation – reduction form of enzymes, observed apparent rate constant, factors	
affecting inhibition, competitive and non-competitive inhibition	

Un	it III Fermenter	8
De	sign, operation and problems during Scale up, management of cellular process	
Un	it IV: Kinetics pattern of various fermentations	8
Cla	ssification of kinetics pattern, as per different scientists, simple, simultaneous, consecutive,	
ste	pwise, complex reactions and their examples	
	it V Air sterilization, aeration and agitation	8
	finition, thermal death time, media heat sterilization, advantages of continuous sterilization.	
	ration and agitation :Oxygen requirement of industrial fermentations, determination of K La lue, factors affecting K La Value	
	it VI: Recovery and purification of fermented product	10
	roduction, removal of microbial cell, Separation techniques like adsorption,	10
	omatography, precipitation, ultra-filtration etc., purification techniques: spray drying,	
	dized bed drying etc. Effluent treatment (ETP)	
	urse Assessment Methods:	
1	Continuous Internal Evaluation: Mid semester examination, Regular Tutorial, home assignments	3
	Semester End Examination.	,

Pre-requisites (if any)	:	a good kn	In order to complete the course studies successfully, it is important to have a good knowledge of FT211, FT213, FT214, HS211, FT223, FT311, FT312, FT313, FT322, FT323 and FT326.					
Course Domain	:	Core						

Course Rationale: -

The aim of the course is to provide students with advanced knowledge in the field of agri-food waste management, particularly on waste treatment ways. The focal point of the course is based on the importance and role of waste management in the environment within the frame of the sustainable concept aspects, description and classification of by-products in agriculture and food industry sectors and possibilities of their reduction and eventually possible re-use.

	urse Objectives: The Course teacher will p to	Course Outcomes: Students will be able to				
1.	Study various waste from agricultural and food industries and evaluate its possible impact on the environment	1.	Identify various waste from agricultural and food industries and evaluate its possible impact on the environment			
2.	Recognize and communicate common methods of waste treatment and disposal	2.	Recommend a variety of ways to treat and dispose of waste.			
3.	Learn the working principles of treatment methods used for effluent and solid waste generated in food industries	3.	Identify various by products from agricultural and food industry and ways to utilize them.			
4.	Understand different waste water treatment and solid waste disposal methods	4.	Suggest different waste water treatment and solid waste disposal methods			

_	Learn different techniques used to prepare		Judge	the	importance	of	development	of	
5.	by products	5.	byprod	ucts					
	Understand legal aspects related to waste		Analyze and apply legal aspects related to waste

Course Rationale: This course explore the information about sugar processing

Co	urse Objectives: The Course teacher will	Course Outcomes: Students will be able to				
1.	Explain basic food science knowledge and get to know sugar processing	1.	Apply the basic food science of Sugar in sugar industries			
2.	Inform students the role of various unit operations and machinery required for sugar processing	2.	Understand the processing of sugar production			
3.	Introduce students to roles of various chemicals for sugar processing	3.	Know equipment required for sugar processing			
4.	Explain students to the different quality aspects of produced sugar	4.	Understand the quality assessment of sugar and its by products			
5.	Describe the basic unit operations used in sugar processing	5.	Design machinery required for sugar processing			
6.	Explore the different grades of sugars	6.	Learn basic unit operations used in sugar processing			

Curriculum Content	Hours
Unit I	8
Introduction: Brief account of Sugar Industry and Sugar Manufacturing Process	
Composition of Sugarcane and Juice, Importance of juice clarification, Weighing and	
metering of juice (Maxwell Boulogne Scale & Magnetic Flow Meters)	
Juice Heating: Types of juice heater, construction & working of tubular heater, removal of	
condensate and non-condensable gases, vacuum equalization, scaling of tubes, cleaning &	
testing of heater, concept of vapor line & dynamic juice heater. Effect of heat on juice,	
Purpose of primary and secondary heating. Construction and working of Direct Contact	
Heater (DCH), Plate Heater (PHE), advantages & disadvantages.	
Unit II	6
Clarification: Techniques of clarification; Defecation, Sulphitation & Carbonation, clarificants	
used in Sugar manufacture. Lime; specification, storage - Preparation of milk of lime; rotary	

coı	ne slacker, classifier, MOL tanks, lime pumps, use of hydrated lime powder. Sulphur; ecification & storage, production of sulphur dioxide gas - combustion of sulphur, enstruction & working of sulphur burner, film type sulphur burner. Liming &					
	lphitation; Effect of					
	sing & sulphitation on cane juice, simultaneous liming & sulphitation.					
Su vel con	bsidation and Filtration: construction & working of Dorr clarifier, operation of Dorr, ocity of juice in clarifier, flash tank cleaning & maintenance of clarifier, Vacuum filter; instruction and working, effect of washing on pol in cake, filtrate receivers, baby condenser, cuum pump, filtrate clarification system.	6				
Un	it IV	6				
Evaporation: Introduction, Construction & Working of Robert type evaporator, Rellieuxs' principles, working of multiple effect evaporator, factors affecting heat transfer and performance of evaporators.						
Pa	n Boiling: Vacuum Pan, Continuous Pan: Boiling Technique					
H	it V	6				
		U

Course Rationale: -

The course is all about a science and engineering field that deals with the study of snack food processing and its products. It is part of processing industry that involves processing, packaging, distribution and transportation of various snack products such as extruded products, fruit and vegetable based snacks, salted, spiced and sweetened coated nuts, grain-based snacks, flour based—batter and dough based snack products, savoury, farsans and instant premixes of traditional Indian snack foods, etc. It also involves science of biochemistry, food microbiology and nutrition. The aim of the course is to provide the students with deep understanding of how nutrients contributes to maintain healthy life and technology contributes to maintain quality, extend shelf life and improve functions of packaging.

Co	urse Objectives: The Course teacher will	Course Outcomes: Students will be able to				
1.	Introduce students to snack foods technology	1.	Understand the concept of snack foods Knowledge about the nutritional profile and consumer demand for snack foods.			
2.	Describe emphasis on to the principles and processing of different snack foods	2.	Identify the purpose and functions of snack foods			
3.	Illustrate the processing of various snack foods	3.	Classify and explain the different types of snack products			
4.	Describe the technology for coated nuts preparation	4.	Apply knowledge for selecting suitable techniques for the snack food processing operations			
5.	Explain Engineering principles and concepts to handle, store and process of extruded snack foods	5.	Analyze flow chart for the production processes of various extruded snack products			
6.	Categorize the equipment, about the operations and importance of quality control in the snack industry	6.	Evaluate the hygiene and sanitation condition in snack food processing plant, equipment, storage and handling			
	Curriculu	m Co	utant Hours

Revision	:	Fourth			Month	:	June 2023		
Pre-requisites (If any)	:								
Course Domain	:	Program o	core						

Course Rationale: This course deals with the knowledge of science, processing and engineering for the implementation of layout designing. It covers all the areas of food processing. In this course different models are also there for study to understand the subject more thoroughly. Apart from designing it will also help students to learn about cost estimation of any unit.

	<u> </u>							
Co	urse Objectives: The Course Teacher will	<i>Course Outcomes:</i> Students will be able to						
1.	Help students to gain knowledge of basic concepts of plant layout and design with special reference to food process industries	1.	Understand about advanced unit operations specific to the food industry and of the criteria for the design of complex food plants					
2.	Introduce students to the various factors affecting for plant location selection	2.	Choose processing site, transportation mode, fuel, energy and their integration with the skills of food technology in the design of complex food plants					
3.	Develop the ability of student to learn about different plant layout and equipment layout	3.	Apply the knowledge of food manufacturing processes and their representation in a flow-sheet preparation of the plant.					
4.	Describe the economics and cost analysis method for plant designing.	4.	Evaluate the critical control points where product or process can be compromised, draw, using standard symbols, and factory layouts.					
5.	Illustrate to the students about factors consideration in new plant building	5.	Design the plant layout and initiate processing related to foods in a safe and creative manner.					
6.	Elaborate to the students about how to initiate processing related to foods in a safe and creative manner.	6.	Create layout of waste treatment plant and management of food plant.					
1								

	Curriculum Content	Hours					
	IT I Introduction	8					
	sic concepts of plant layout and design with special reference to food process						
	ustries. Application of HACCP concept, ISO, FPO & MPO requirements in food						
	nt layout and design.						
	IT II Plant Location	8					
Influence of location on plant layout, location factors, location theory and models,							
	onomic plant size, types of manufacturing processes like continuous, repetitive						
	l intermittent processes.						
	IT III Plant Layout	8					
	eparation of a Plant Layout, Plant Layout problem, importance, objectives,						
	ssical types of layouts. Evaluation of layout. Advantages of good layout						
	IT IV Plant Building	8					
	nsiderations in building design, type of factory buildings, choice of building						
	astruction, material for floors, foundation, walls, doors, windows, drains etc,						
	ntilation, fly control, mold prevention and illumination in food processing						
	ustries.	10					
	IIT V Plant layout & Equipment Layout	12					
Plant layout and design of bakery and biscuit industries; fruits and vegetables							
	cessing industries including beverages; milk and milk products; meat, poultry						
	fish processing industries.						
_	uipment layout in Food Industries:						
	sic understanding of equipment layout and. Preparation of flow sheets for						
	terial movement and utility consumption in food plants.	8					
	VIT VI Cost Analysis	0					
	ted cost, variable cost, depreciation, method of economic analysis, profitability plysis of a plant						
	•

Pre-requisites (If any)	:	Pre-requisites include basic knowledge of soft skills, presentation and all specialized courses of food technology.							
Course Domain	:	Research Skills							

Course Rationale: Students' evaluation is by continuous internal examination and based on External Oral Evaluation at the end of the semester, based on attendance during the entire semester, project report submission at the end of semester.

Course Objectives: The Course Teacher will			Course Outcomes: Students will be able to				
1.	Plan for various activities of the project and distribute the work amongst team members;	1.	Apply fundamental and disciplinary concepts and methods to solve problems				
2.	Promote self-study, critical thinking and independent research ability;	2.	Identify, analyze, and solve problems				
3.	Make the students initiate their own small conceptual or practical based projects individually or as a team of no more than 4 members;	3.	Integrate information from multiple sources.				
4.	Make them use Research Methodology for the task undertaken;	4.	Analyze developed products				
5.	Trial exercise that may help them to satisfactorily complete their project	5.	Design, project manage and evaluate a concept/model/product				

Curriculum content

The students either individually or in a group of maximum 4 members will undertake a Major project on a particular topic under the guidance of an internal course teacher. Prior to the topic selection, the course in charge will guide them about searching topic related to requirements of industry, farmers and other societal issues. During phase II student will complete all objectives of their proposed work. A report is to be written upon completion of the activity. The Department will provide a specific format for report writing. The assessment of the major project work will be based on: 1. Attendance 2. Physical Demonstration of their work 3. Presentation based on the

work carried out 4. Major Project reports submitted

Pre-requisites		:	It does not require any pre-requisite as such but eager to know about our profession's connectivity, role and responsibility towards society and environment.					
Course Domain		:	Audit Course at institute level, Humanities & Social Science					
Cou	rse Rationale:							
Cou	Course Objectives: The Course Teacher will Course Outcomes: Students will be able to						e to	
1.	1. Explain importance of engineers' connectivity with society and environment.				Realize the role of engineers towards society and environment.			
2.	Make students aware of ethics and responsibility of engineers as professionals.				Demonstrate ethical practices and responsibility as a professional.			
3.	Make them able to undergo ethical judgments and solve problems.				Make ethical judgments and solve problems.			
4.	Develop attitudes required of engineers and values shared by engineers			4.	Get developed for engineers' attitude with sharing of values.			
5.	Help them practice decision making & team players. 5.				Practice decision making and team culture.			
6.	Describe importance of lifelong learning.				Follow lifelong	g learning attitude	:.	

Curriculum Content	Hours
Unit I: Engineer, Society and Environment	07
1. Understanding of the relation between engineering and society/Environment. 1.1	
Understanding of the effects and impacts of science and technology on human society. 1.2	
Understanding the effects and impacts of science and technology on the natural environment. 1.3	
Understanding the characteristics of the modern globalized world.	
Unit II: Ethics and engineering Profession	07
2 Understanding of ethics and responsibilities of engineers as Professionals. 2.2 Understanding	
of the roles and responsibilities of engineers in Society. 2.3 Understanding of the basic concepts	
and theories of ethics. 2.4 Understanding the relation between law and ethics and having basic	
legal literacy. 2.5 Understanding of the nature of professional ethics.2.6 Understanding of the	
purposes and roles of codes of ethics and those of conduct set by engineering societies	
and associations. 2.7 Understanding of the social responsibility (SR) of organizations (companies	
in particular). 2.8 Understanding of ethics in specific areas (and knowledge of concrete	
cases) 2.9 Understanding the nature of ethics in research and development	
Unit III: Ethical Perception and Problem solving	06
3 Ability to make ethical judgments and solve problems. 3.2 Understanding and application of	
methods to identify related factors in ethical issues and to make a structural analysis of them. 3.3	
Understanding and application of methods to analyze technical factors in ethical issues and make	
structural analysis of them. 3.4 Understanding and application of methods to analyze	

organizational factors and provide organizational solutions. 3.5 Ability to design one's conduct to solve ethical problems Based on the abilities to analyze factors gained through 3.2–3.4, 3.6 Comprehensive problem-solving capability

Unit IV: Engineer's attitude and Social Responsibility

4 Attitude required of engineers and values shared by engineers. 4.1 Attitude to think autonomously and independently based on an understanding of the responsibility of an engineer. 4.2 Attitude to accept a diversity of values (recognizing the existence of the various value systems different from their own as well as the multiplicity of values). 4.3 Attitude to share values (such as safety emphasized in the codes of ethics) to which engineers should assign paramount importance. 4.4 Attitude and willpower to act on ethical judgments of their own.
